---

This series high power programmable DC power supply adopts high frequency isolation and active PFC design, which makes it can achieve high efficiency at any output point.

All models are CE and UKCA marked in accordance with the Low Voltage, EMC and RoHS Directives, have worldwide Safety Agency approvals (UL/cUL/IEC/EN 61010-1) and offer a five year warranty.

Suitable for both the bench-top during product design and development, as well as rack mount ATE systems during QC and burn-in testing and during production, semiconductor testing, ...

From powering the building to powering individual racks, HARTING connectors enable a reliable chain of power throughout a data center. Eliminating hardwired (bolt-in) connections shortens the critical path. ...

Metered-by-outlet Rack Power Distribution Units (Rack PDU) provide real-time remote monitoring at the outlet level to provide advanced data center energy management.

A wide variety of power solutions exist for non isolated DC/DC rails. You can choose from power modules with integrated inductors, metal-oxide semiconductor field-effect transistors (MOSFETs) and ...

Our partners rely on Phoenix Contact for reliable power distribution, high system availability, and efficient data transmission in the control cabinet. Equip the PDUs in the following areas.

Tailored for small data centers, server rooms, and network closets with high power density. Ensure maximum reliability and uptime with real-time power quality monitoring and rapid response for ...

Advanced Energy's Artesyn iLS1500 series is a programmable DC power supply with a single 1500 W output. With 12-bit D/A & A/D converters embedded, the power supplies come with the ...

# 1500V Communication Power Supply Rack for Data Centers

These devices ensure clean, stable power reaches every server, switch, and storage device in your racks, while offering the monitoring and control capabilities vital for modern data center management.
