Can geological work support the development of the Yangtze River economic belt?

Based on the demand-problem-goal oriented, the paper puts forward the idea of geological work to support the development of geological work of the Yangtze River economic belt during the 13th five-year plan.

What are the major geological problems in Yangtze River economic zone?

In some parts of Yangtze River economic zone, there are some major geological problems such as active faults, karst collapse, ground subsidence, landslide-collapse-debris flow, affecting the river-crossing channels, high-speed railway, urban agglomeration and green ecological corridor planning and construction.

Which strata are well developed in the Yangtze River economic zone?

In the Yangtze River economic zone, the strata from Archean group to Quaternary system of Cenozoic group are well developed.

Does karst collapse affect urbanization of Yangtze River agglomeration?

Urbanization of the Middle reaches of Yangtze River Agglomeration is typically challenged by karst collapse risks.

A subsidiary of China National Offshore Oil Corporation (CNOOC) has completed the construction of China's largest LNG storage base, a move that aims to ensure energy security and support green ...

in the Yangtze River Delta based on local characteristics. The primary features, key issues, and overall integration of the system are discussed. At the same time, the economic, ...

Located on China's longest river Yangtze, approximately 44km from the city of Yichang in Hubei province, the hydroelectric facility generated its first power in July 2003 and achieved its full ...

This appendix documents work completed on project benefits for the Yangtze River Economic Belt Jiangxi Ecological Civilization and Circular Economy Project. The work was undertaken to provide a ...

Yangtze River Energy Storage offers a diverse portfolio of energy storage solutions that cater to both residential and commercial needs. Most notably, the organization specializes in ...

200kWh Energy Storage Unit for Mining in the Yangtze River Economic Belt

Here, we focused on the Yangtze River Delta (YRD) urban agglomeration in China and proposed an optimization framework for energy, environment, and economy.

Focusing on the Yangtze River economic zone, the previous geological researches are systematically summarized, resources and environment conditions and major geological problems ...

For this purpose, this paper uses the super-efficiency SBM model, ML index and Tobit model considering undesired output to explore the energy efficiency and the main factors affecting it of nine...

Support the creation of green energy storage bases in the Yangtze River Delta, promote the construction of new energy storage on the power supply side, grid side, and user side, and ...
