-----  
What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What power configurations does the outposts network rack support?

The Outposts network rack power shelf supports one power configuration. A central power bus bar in the back to distribute power to each server. We have whips supporting a variety of common power types. Each Outposts compute rack supports 10KVA-30KVA power supply and redundant feeds. Each Outposts network rack requires 8.89 KVA power supply.

How does Great Lakes ship outdoor cabinets?

Whether outdoor cabinets need to ship to one location, a few, or hundreds, Great Lakes can work out the logistics to ensure the product arrives when and where required. Configured cabinets typically ship on a shock pallet, but crates and pallets with a ramp can also be used.

What are outdoor rated cabinets?

As part of an 18-month rollout, outdoor-rated cabinets are integrated with power components, tested by certified electricians, and shipped bi-weekly. Like traditional indoor datacom applications, cabinets for outdoor use require cable management, power, airflow, and security infrastructure.

Outdoor integrated cabinet is well suited for power equipment, batteries, telecom gear, all integrated into a robust, economical package. The cabinet contains internal mounting rails, which allow installation ...
