Designed to support very large solar modules, including 550W panels, the IR-45ASA can be assembled in just 2 minutes per frame, making it the most cost-effective ground mount racking system available.

The IR-45 is one of the most universal solar module ground mounting systems ever developed, and it was specifically designed to rack solar modules of any size, even 700 Watt jumbo size solar panels ...

IntegraRack IR-45ASA adjustable solar ground mount: 15-45° tilt, aircraft-grade aluminum, DIY-friendly, scalable, compatible with all full-size panels.

The IntegraRack IR-45ASA is a durable, flexible Ballast Rack that enhances solar array alignment throughout the year. This creative rack design supports seasonal angle modifications, which improve ...

The system is engineered for quick installation, with a 2-minute assembly time per frame, and can withstand wind loads up to 120 mph and snow loads up to 100 pounds per square foot. Constructed ...

This system can be mounted almost anywhere with IntegraRack's four available mounting options and is strong enough to withstand wind speeds of up to 200 miles per hour (See Datasheets & Engineering ...

This system is designed to rack very large solar modules, even 550W solar panels are no match for the IR-45ASA Racking System. With 4 innovative mounting options available to choose from, even soft ...

Built for large-format solar panels (up to 550W), it features a seasonally adjustable tilt angle (15°-45°) to maximize year-round energy output--no tools, digging, or concrete required.

The IR-45 is the fastest and easiest ground mounting system available and allows for modules of any size to be racked at a fixed 45°; for optimal year-round energy production throughout most of the ...
