What are data center rack and cabinet solutions?

These data center rack and cabinet solutions are ideal in places where the ambient temperature is insufficient to support hot data center machines. Custom production gives you the privilege to choose preferred specifications to create your custom made boxes.

What size server & network cabinets are available?

With the most extensive array of sizes ranging from 42-52RU, heights of 600mm to 800mm (23.62" to 31.5"), and depths of 36" to 54", providing server and network cabinets that meet any specific requirements.

Why is data center construction so important?

The rapid expansion of cloud computing, artificial intelligence and data-driven applications has led to a recent surge in data center construction. As demand for digital storage and processing grows, data centers provide critical infrastructure for meeting current and future technological demands.

This triplet rack is ideal for shipping your fully populated cabinets to and from an integration facility. Its fully welded tubular steel frame incorporates our seismic design and construction.
