What is a solar powered street light?

LED Lighting Solutions' 15W Solar Powered LED Street Light is a part of the Pro street lighting series. This product comes with an integrated solar panel, bright LED lights, integrated solar rechargeable battery and motion activation sensor, making this an eco-friendly and efficient product.

How long do solar lights last?

Most solar lights run between 6 and 10 hours on a full battery charge. This is purposefully designed so that lights can run all night after a day of average sunlight. How dark does it have to be for solar lights? As the name indicates, solar lights need sunlight for a maximum to provide illumination.

How much sunlight do solar lights need?

As the name indicates, solar lights need sunlight for a maximum to provide illumination. It is recommended that you need to give direct sunlight for 4 to 10 hours. 4 hours of sunlight can give a charge of up to 6 hours. You can have up to 15 hours of charge with direct sunlight of 8 hours.
