Could hidden communications equipment be found in Chinese-manufactured solar energy parts?

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Could hidden radios be embedded in solar-powered highways?

U.S. transportation officials are warning that hidden radios and other undocumented devices may be embedded in solar-powered highway infrastructure, raising fears of foreign surveillance and sabotage in critical American systems.

Are there undocumented cellular radios in foreign-manufactured inverters & battery management systems?

The U.S. Federal Highway Administration circulated the advisory on August 20, cautioning that it discovered undocumented cellular radios in some foreign-manufactured inverters and battery management systems.

Can cellular radios be found in solar inverters?

The report cites US energy officials and warns that comms devices--including cellular radios--have been found in solar inverters, which are used to connect solar panels to electricity grids, and solar batteries acquired from multiple Chinese providers.

U.S. transportation officials are warning that hidden radios and other undocumented devices may be embedded in solar-powered highway infrastructure, raising fears of foreign surveillance and...

The report cites US energy officials and warns that comms devices--including cellular radios--have been found in solar inverters, which are used to connect solar panels to electricity grids,...

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented communication ...

Over the past nine months, forensic security teams have logged multiple brands of Chinese solar inverters containing hidden wireless communication equipment. Investigators have ...

Are solar-powered communication cabinet batteries allowed to be bought and sold

Solar-powered telecom battery cabinets offer cost savings, eco-friendly energy, and reliable power for remote areas, revolutionizing telecom networks.

As of January 1, 2023, California Energy Code requires that PV and battery systems to be installed on all new buildings. New buildings and additions to existing buildings include solar readiness ...

Stay compliant with state battery recycling laws. Find regulations on battery disposal, retailer requirements, and point-of-sale notices.

In February, two U.S. Senators introduced the Decoupling from Foreign Adversarial Battery Dependence Act, banning the Department of Homeland Security from purchasing batteries ...

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said.

The US Department of Transportation's FHA has issued a warning that hidden cellular radios have been found in unspecified foreign-made inverters and batteries used in PV highway ...
