What is the biggest PV power plant in Armenia?

Located close to the Lake Sevan, the 62 MW dc project will be the biggest PV power plant in Armenia. Built with double-faced solar panels, the project will be contributing to the country's sustainable economic growth, generation of wealth and local employment.

How much solar power does Armenia have?

Newly tendered solar deals comprise 210 MW of capacity. The government expects solar PV capacity to reach 100 MW by 2024 and 1,000 MW by 2030. According to the MTAI, which oversees the energy sector, wind energy potential in Armenia is approximately 450 MW.

What is the procedure for energy audits in Armenia?

The Procedure for Energy Audits is the norm-setting legal act that regulates energy audits in Armenia. This procedure was approved by Government Decree 1399-N of 31 August 2006 and revised by Decree 1105-N of 4 August 2011 and Decree 1026-N of 10 September 2015.

What percentage of Armenia's Energy is renewable?

Renewable energy resources, including hydro, represented 7.1% of Armenia's energy mix in 2020. Almost one-third of the country's electricity generation (30% in 2021) came from renewable sources. Forming the foundation of Armenia's renewable energy system as of 6 January 2022 were 189 small, private HPPs (under 30 MW), mostly constructed since 2007.
