The 9200 Battery Test System is highly configurable and can parallel up to 21 power modules that can test multiple batteries with different test programs and start/stop times!

By editing test steps, the user may perform constant current charge, constant pressure charge and constant current/power/resistance discharge tests on multi-channel cells or battery packs.

The equipment integrates both charging and discharging functions, simulating factors such as temperature and humidity, helping to comprehensively evaluate battery quality.

Product description: The battery charge discharge system is a test equipment for battery pack charge-discharge cycles tests. This tester is mainly applied to the ...

Power battery virtual distribution: charge/discharge curve fitting, battery consistency test and evaluation. High-performance charge/discharge test platform developed for high-power battery modules (or packs).

Supports dedicated charge/discharge tests on multiple battery modules or packs with distinct test characteristics. Channels can be paralleled for higher current requirements, offering flexibility ...

With a wide voltage detection range from 9V to 99V which make it can measure varieties of batteries from 12V-84V. Charging test and discharge test can be performed for lead-acid ...

With a wide voltage detection range from 9V to 99V which make it can measure varieties of batteries from 12V-84V. Charging test and discharge test can be performed for lead-acid batteries, lithium ...

Product description: The battery charge discharge system is a test equipment for battery pack charge-discharge cycles tests. This tester is mainly applied to the high-power battery packs, such as the ...

Battery cabinet charging and discharging test system

The battery charge & discharge test chamber is a device specially designed for charging and discharging safety tests on batteries (such as lithium-ion batteries). Sanwood"s Battery Charge ...
