Why is Tata Power launching a Bess project in Mumbai?

With real-time monitoring from Tata Power 's Power System Control Center (PSCC), the BESS will strengthen Mumbai's grid resilience, support clean energy adoption, and fulfill energy storage obligations. The project underscores Tata Power's commitment to sustainable, future-ready power solutions.

What is Bess & how does it work in Mumbai?

The cutting-edge BESS, equipped with advanced 'black start' functionality, will enable a swift recovery of power supply to critical infrastructure, including the metro, hospitals, Airport, and Data Centers, in case of grid disturbances. This will prevent large-scale blackouts and enhance Mumbai's power network resilience.

How a 100 mw Bess will be installed in Mumbai?

100 MW BESS will be installed across 10 strategic locations in Mumbai over the next two years - Will ensure uninterrupted power supply to critical infrastructure such as the Metro, Hospitals, Airport, and Data Centers during grid disturbances, and will support grid through islanding to prevent blackouts

Will Tata Power install 100MW Bess in Mumbai?

In March 2025, Tata Power Renewable Energy Limited signed an MoU with the government of the Indian state of Andhra Pradesh to explore the development of 7GW of renewable energy projects. "Tata Power gains approval to install 100MW BESS in Mumbai, India" was originally created and published by Power Technology, a GlobalData owned brand.

The BESS, featuring "black start" capabilities, will facilitate quick power restoration to essential services such as the metro, hospitals and airports.
