What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

How is a telecom cabinet installed?

Installation: The cabinet is installed on-site, typically on a concrete pad or mounting base. All telecom equipment is configured and connected to the appropriate power sources and communication lines.

Why do I need a telecommunications cabinet?

These cabinets also make it easy for technicians to reach the ports they need to expedite service. Patch panels: If your telecommunications system incorporates patch panels to connect and manage your incoming network cables, you can keep them safely stored in your cabinet.
