How will Brussels help reduce emissions?

To meet those goals, Brussels will allow European countries to fund investments that cut emissions, such as industrial decarbonisation projects and renewable energy products. However, the subsidy limits for cleantech manufacturing are lower than during the pandemic and subsequent energy crisis, according to the draft.

How has the energy crisis impacted energy subsidies?

The energy crisis made it necessary to take bold policy initiatives in the European Union to mitigate the social and economic impact of the energy crisis. These exceptional measures to address the energy crisis have greatly impacted the trends in energy subsidies, temporarily reversing the recent declining trend of fossil

How can fossil fuel subsidies help the EU?

Fossil fuel subsidies. Spending public funds on incentives that go against the transition will slow down the transition and make it more costly. Energy savings and reduced reliance on fossil fuels in the residential, power, transport and industrial sectors should help the EU in a variety of ways

Why did Brussels suspend 'clean technology' enforcement?

But successive economic crises prompted Brussels to suspend or relax enforcement across key sectors of the economy -- an approach that will be extended on so-called clean technologies in the latest guidelines, according to a draft seen by the Financial Times.

Subsidies were provided through feed-in tariffs (FITs) and grants, which helped reduce the financial burden on consumers and businesses adopting energy storage systems. However, as the ...
