In February, state-owned utility and power generation firm NEK announced plans to deploy BESS totalling nearly 300MWh at five of its hydropower sites across Bulgaria.

Planning is underway in Bulgaria to install two underground pumped storage hydropower facilities with a combined capacity of 1.6 GW. At the same time, Chaira, the largest system of the ...

This significant milestone marks the system as Bulgaria's largest BESS project to date, jointly developed by Kehua, the world-leading PV and ESS solution expert and Solarpro, the largest ...

Bulgarian state-owned power utility, the National Electricity Company (NEK), plans to install a 10 MWh battery energy storage system (BESS) at its recently reconstructed Vacha 1 ...

Bulgaria became the EU's fastest-growing market for battery energy storage systems (BESS) in 2025, installing close to 2,500 MWh of new capacity, and is poised for a four- to fivefold ...

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...

In June 2024, the 25 MW / 55 MWh utility-scale battery energy storage system (BESS) located in Razlog Municipality, Southwestern Bulgaria commenced commercial operations.

Bulgaria is taking bold steps toward a greener energy future, having recently wrapped up its most ambitious energy storage tender to date.

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Bulgaria power plant energy storage power station project

Bulgaria has inaugurated a 124 MW / 496.2 MWh battery energy storage system (BESS) in the town of Lovech, described by the Ministry of Energy as the largest such installation currently ...
