What equipment does a distribution centre use?

Pallet racks, forklifts, conveyor systems, barcode scanners, and sorting equipment are common. Many DCs also use automation and robotics to optimise efficiency.

4. What are the types of distribution centres?

How does a distribution centre work?

Distribution centres are designed to move inventory quickly. Here are their primary functions:

- Receiving: Goods arrive from manufacturers or suppliers and are logged into inventory.
- Sorting and Storage: Products are categorised and stored temporarily for rapid retrieval.
- Order Picking: Items are selected according to customer or retailer orders.

What are the different types of distribution centres?

Understanding the different types of distribution centres can help businesses choose the right setup for their needs:

- Retail DC: Designed to supply retail stores directly. Ideal for fast-moving consumer goods.
- E-commerce Fulfilment Centre: Specialises in processing online orders quickly, often with same-day or next-day delivery.

Why should you choose a 3PL distribution centre?

Companies like MSL UK LTD and EFCL have demonstrated that multi-centre networks drastically cut delivery times and shipping costs. For businesses looking to scale or enter new markets, outsourcing to a 3PL distribution offers cost savings, flexibility, and professional expertise.

1. What is the main purpose of a distribution centre?
