What is a residential solar battery system in Cape Town?

A Residential Solar Battery System in Cape Town enables you to operate independently from the grid for 6 to 8 months of the year. It consists of Solar Panels, an Inverter and a Lithium Battery.

Why should you install a solar power system in Cape Town?

They can also help you to save thousands of Rands that would otherwise be spent on electricity bills in Cape Town. In addition, a company's income tax liability can be significantly decreased as it contributes towards deductions. How long does it take to install a solar power system?

What is a solar battery storage?

A solar or PV panel is a frame with several connected solar cells. The more solar panels that are connected together means more electricity can be produced. This clean electricity from the sun can replace power from the national grid and to top it off you can install a solar battery storage to maximize the benefits of going solar.
