Why do we use a solar inverter in Cape Town?

Therefore, we use a solar inverter in Cape Town. A solar inverter converts the DC current obtained by the solar panels in the solar battery bank, and transforms it into a working and clean AC electrical current for household use in Cape Town.

Where can I get solar panels in Cape Town?

Solar Guru offers solar panels, solar inverters and solar batteries for all your solar installation requirements in Cape Town. Solar Guru offers solar panel products to all provinces across Cape Town, Western Cape. By using solar panels in Cape Town, you are generating electricity in a dependent manner from using Eskom.

How does an off-grid solar inverter work in Cape Town?

The off-grid solar inverter converts the DC power stored in the battery bank to AC current to use in your home in Cape Town. A off-grid solar inverter can also be connected to a generator as a backup power if the solar panels doesn't produce enough power in Cape Town.

What are hybrid solar inverters in Cape Town?

Having all the components in one simple plug and play unit means hybrid inverters in Cape Town are generally much lower cost and easier to install. These hybrid solar inverters in Cape Town also offer instantaneous backup like a UPS.

These inverters combine a solar inverter, charger and battery inverter together with software which can be programmed to determine the most efficient use of your available energy in Cape Town.

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.
