Using the System Performance Index (SPI), the HTW Berlin compares storage systems in terms of storage capacity, performance, conversion efficiency and standby power consumption, among other ...

Discover how Berlin's groundbreaking energy storage initiatives are reshaping renewable energy integration and creating new opportunities for global stakeholders.

A total of 17 manufacturers with 22 energy storage systems took part in the established energy efficiency comparison. Eight devices were new to the test, which is run annually since 2018, ...

In comparison to 2021, the market for home storage systems (HSS) grew by 52% in terms of battery energy in 2022 and is by far the largest stationary storage market in Germany.

20 solar energy storage systems from a total of 14 manufacturers have been evaluated by the HTW Berlin University of Applied Sciences in the latest edition of its storage test.

Designed to stabilize grids and maximize clean energy use, these systems address critical challenges like solar intermittency and peak demand. This article explores how this technology works, its real ...

In its annual Energy Storage Inspection, the Solar Storage Systems Research Group at HTW Berlin compares and evaluates the energy efficiency of PV-battery systems.

This article explores the key players, projects, and trends shaping the city's energy storage landscape while highlighting opportunities for businesses and investors.

17 manufacturers took part in the Energy Storage Inspection 2025 with laboratory measurements from a total of 22 systems. Two of those systems were purchased independently. Five manufacturers ...
