Why should you choose Bess Australia?

See our terms of use and privacy notice. BESS Australia provides reliable energy storage solutions designed for efficiency and sustainability. We specialize in cutting-edge battery storage systems that enhance energy reliability and reduce environmental impact. Power your future with advanced technology and expert solutions tailored to your needs.

What makes a Bess unit a good choice for Australian conditions?

For Australian conditions Fully insulated, temperature-controlled and designed to survive the harsh Australian conditions; our BESS and teams have a proven track record of successfully deploying BESS units in remote outback Australia. Adaptable

What is a Bess & how does it work?

A BESS allows your business to optimise energy usage by storing energy during off-peak hours or from renewable sources and using it during peak demand times. This helps to avoid high grid electricity costs and demand charges. Additionally, a BESS can provide backup power during outages, preventing costly downtime.

What is a BMS on and off-grid application?

On and Off-Grid Applications Integrated with the generation II BMS, and an advanced status LED, making it easy to diagnose battery conditions. Integrated with the generation II BMS, and an advanced status LED, making it easy to diagnose battery conditions.

These Australian, fully integrated, on and off-grid power systems take modularity to the next level, perfect for small, medium and large-scale projects in domestic, commercial, utility and government ...

At Stralis Energy, we specialise in custom-designed Battery Energy Storage Systems (BESS) ranging from 20kWh to 5MW, engineered to deliver reliable, scalable, and flexible energy solutions for ...

Our BESS systems can be mixed and matched to suit specific project requirements, allowing for ultimate flexibility. Whether you need a small or large-scale system, we've got you covered.

We specialize in cutting-edge battery storage systems that enhance energy reliability and reduce
