Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

Who is gas storage CZ?

Gas Storage CZ specializes in underground gas storage solutions, operating six facilities with a total working volume of 2.7 billion cubic meters. The company's focus on improving storage quality and quantity aligns with the growing importance of energy storage in the industry.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.

This article explores the applications, market trends, and competitive advantages of Czech-made storage systems, with actionable insights for businesses seeking reliable energy management.

Enhancing Energy Resilience in Czech Republic SINEXCEL, a leading name in energy storage solutions, has embarked on an ambitious project to boost the resilience of the Czech energy network ...

With EUR279 million EU funding pouring into its grid modernization [1], the Czech Republic is rewriting its energy playbook. Let's explore how this Central European nation is becoming a testing ...

This article explores how cutting-edge storage technologies are addressing grid stability challenges while unlocking new opportunities for businesses and communities.

How can Czech organisations make the most of their renewable generation assets? Here's a review of energy storage in the Czech market.

The company specializes in sustainable and innovative modular energy storage systems, offering products like

Czech energy storage equipment

energy storage units and management systems. Their focus on efficient and pollution ...

The hybrid energy source, Energy nest, with a total current output of 30 MW to the grid, represents such a solution by combining gas turbines and battery storage, and opens a range of ...

Currently, international energy storage giants such as Tesla and CATL have begun to deploy in the Czech market, collaborating with local enterprises to develop large-scale energy storage projects.

In early 2025, the Czech Parliament approved new legislation enabling stand-alone battery storage systems to be connected directly to the grid - something that was not previously ...

In the form of battery storage, we will provide you with the functioning of the essential infrastructure necessary for the operation of your facility. Our solution is suitable for industrial facilities or power ...
