This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

The most comprehensive source of information on incentives and policies that support renewables and energy efficiency in the United States. Managed by NCSU.

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

The Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic identification, ...

With KORE's DC Blocks, customers will receive an energy storage solution designed to site-specific needs and footprints. The products join a select group of storage solutions manufactured ...

Email a request to 2023DCESGP.grants@dc.gov with "Request copy of RFA-FY23-PCD-811" in the subject line. The deadline for application submissions is August 28, 2023.

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy economy.

Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. 1 Batteries are one of the most common forms of electrical energy storage.
