The Current OS protocol is a new system approach of DC electrical distribution that makes the most of Direct Current and power electronics to build microgrids simpler, safer, cheaper:

Fully integrated, outdoor NEMA 3R and NEMA 4X nanogrid and microgrid cabinet systems. Configurable with internal power conversion and power distribution and energy storage or energy ...

The floor-standing outdoor integrated cabinet is an outdoor integrated cabinet constructed using high-quality metal sheet materials.

Power grids depend on reliable solutions to ensure trouble-free operations. To this end, Rittal offers you a portfolio of secure and robust outdoor enclosures, together with matching climate control systems, ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

A heavy - duty microgrid cabinet built to meet extreme power demands. It boasts a battery voltage of 832V, a grid - connected output of 330kW, and a maximum PV input of 4750A.

DC microgrid outdoor cabinets are used to protect power distribution units, automation controllers, and monitoring devices in harsh industrial environments. Their rugged construction, advanced thermal ...

Expand capacity effortlessly by connecting multiple units, making it adaptable to scenarios ranging from power generation to user-side needs. Experience the future of energy storage with exceptional ...

DC Cabinet is an advanced liquid-cooled outdoor energy storage cabinet designed to support 200+ kW applications with rapid deployment and a minimal footprint, renowned as its integrated safety features.

DC Microgrid Outdoor Cabinet for Power Distribution Stations

The Photovoltaic Micro-Station Energy Cabinet is a hybrid power compact solution for remote energy and outdoor telecom sites.
