Belden's Server and Switch Cabinets are certified to Seismic Zone 4 requirements, passing vibration and shock testing per GR-63-CORE Network Equipment Building System (NEBS) requirements with ...

Seismic Rack Cabinets are engineered to protect critical IT and networking equipment in earthquake-prone areas. Built with reinforced construction, they offer stability, durability, and reliable ...

We work with companies to custom manufacture seismic cabinets to fit their requirements. Working with Juniper, we manufactured this custom seismic rack to fit their MX2020 router, which is a 45RU high. ...

Our modular seismic electronic equipment and Seismic racks are manufactured for stability, and our solutions are guaranteed to keep their composure in the face of seismic activity. All our seismic racks ...

The Z4-Series SeismicFrame[®]; Cabinet System delivers robust seismic protection for critical infrastructure in Zone 4 seismic zones, meeting Telcordia GR-63-CORE requirements.

Whether your venue is earthquake-prone or subject to regular vibration, such as an airport or factory, a seismic enclosure may be the answer for keeping equipment safe. Eaton Seismic Cabinets are ...

Explore our seismic cabinets designed for maximum stability and safety. Protect your equipment with Emcore's robust solutions for seismic environments!

Products include 2- and 4-post racks, indoor/outdoor cabinets, and seismic accessories; all constructed of heavy gauge steel. Tested to NEBS-Telcordia GR-63-CORE Zone 4 Standards

It is designed for secure, high density server and networking applications in IT environments that are earthquake prone or subject to regular vibration, such as an airport or factory.

Earthquake-resistant inverter cabinets for airports

Our EZ Seismic Cabinet is a tested, high-capacity solution engineered to keep mission-critical hardware protected, organized, and secure in even the most demanding seismic environments.
