Investment in energy storage and grid flexibility, SolarPower Europe told EU energy ministers at a recent summit in Brussels, can structurally decouple the European economy from ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the ...

Research institutions across Europe are developing next-generation storage technologies, including advanced flow batteries, compressed air energy storage, and hydrogen ...

We consider three energy storage technologies, namely battery, pumped hydro, and hydrogen storage. We find that the cost-minimal energy storage mix in a country depends on the ...

European Energy has secured EUR 37.9 million of long-term project financing for a hybrid solar and battery storage project in Saldus, Latvia. Once operational, it will be among the most ...

European Energy has officially opened its Kvisted energy park in Denmark, a 101-MW photovoltaic (PV) park with 200 MWh of batteries touted as Northern Europe's largest combined ...

Sungrows new integrated DC-coupled platform for European utility-scale solar-plus-storage lowers costs, boosts efficiency, enables longer discharge, and ensures reliable grid support.

Since 2024, SolarPower Europe has been running the Let's Flex campaign to put flexibility on top of the EU energy policy agenda. In July, this work was expanded by the launch of the ...

European Energy has commenced commercial operation of the Kvisted solar and battery park in Denmark, where a 200 MWh battery system will support local solar power storage ...

European new energy solar energy storage

New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according to the latest European Market Outlook for Battery ...
