What is Bess & how does it work in Mumbai?

The cutting-edge BESS, equipped with advanced 'black start' functionality, will enable a swift recovery of power supply to critical infrastructure, including the metro, hospitals, Airport, and Data Centers, in case of grid disturbances. This will prevent large-scale blackouts and enhance Mumbai's power network resilience.

Why is Tata Power launching a Bess project in Mumbai?

With real-time monitoring from Tata Power's Power System Control Center (PSCC), the BESS will strengthen Mumbai's grid resilience, support clean energy adoption, and fulfill energy storage obligations. The project underscores Tata Power's commitment to sustainable, future-ready power solutions.

Why is Tata Power deploying a Bess system?

It will also enable better utilization of solar energy by storing surplus daytime power and making it available during peak demand, ensuring optimal renewable energy integration with an increase in Green Energy consumption. Additionally, Tata Power's BESS deployment will also fulfill energy storage Obligations.

Where is Bess located?

1. Address: 1F, Building 2, No. 1876, Chenqiao Road, Fengxian District, Shanghai, China  
2. Phone: 008613816499542
