According to the latest project listing by Renewables Finland, nearly 26 gigawatts (GW) of utility-scale solar power are planned in Finland. In total, more than 300 solar power projects are ...

EPV Energy's new solar park is set to become one of Finland's largest, featuring 123,000 solar panels. ABB has joined the project as a key technology provider, delivering automation and ...

Even challenging terrain can be perfectly suited for solar power. A large solar power plant has just been completed in Kitee, on the shores of Lake Saimaa, transforming a former industrial ...

The European Climate, Infrastructure and Environment Executive Agency (CINEA) has signed grant agreements with seven solar projects across Finland with a combined capacity of ...

Read about solar power production, its costs and environmental effects and the project development of the solar power plant. Renewables Finland currently maintains three up-to-date lists and statistics ...

The solar power plants greater than 1 MW currently being planned, under construction or in production can be viewed using the map service. In addition, the total unconnected solar power ...

Solar power in Finland is contributing to the transition towards low-emission energy production. Technological development, falling costs and climate goals have together accelerated ...

Finland's large-scale solar capacity more than doubled in 2025, buoyed by the commissioning of the country's first solar projects larger than 50 MW. Another record year for ground ...

Solar power generation forecasts are based on weather forecasts, estimation of the total installed solar panel capacity and the estimated locations of the panels in Finland.

A Finnish energy company, Ilmatar Energy, is planning to build a massive 400 mw solar power plant in

Finland power supply solar site

Sodankylä, Lapland, near the Arctic Circle.
