How do I rent a rack in the data center?

To rent a rack or rack space in the data center you need to contact our support team. During a free consultation, you will receive comprehensive information about the terms of the rent and technical details, as well as an estimate of the cost of services.

What are the features of a rental rack in a data center?

Rental racks in the data center are equipped with redundant uninterruptible power supplies with the N+1 scheme support: in case of UPS failure in a rack, the redundant UPS will be connected automatically. Biometric control system in the data center and strict access authorization. 24/7 security checks. Select the best location for hosting.

What is the power supply capacity of a rack?

Power supply capacity up to 8 kW with scalable and redundant power. Power consumption is measured by an individual meter in the rack. Provision of IPv4 and IPv6 IP addresses for server when renting a rack.
