The statistics for operational and planned projects are updated biannually, while the list of projects under construction is updated as new information about investment decisions becomes available.

Take the Kalasatama Smart District project. They've achieved 83% energy self-sufficiency through hybrid systems storing solar energy as both electricity and heat. During January's polar vortex, these ...

The data contains the photovoltaic production potential calculated per building, provided that the entire area suitable for solar panels is covered with solar panels.

Discover how Helsinki's 16 kW solar system urban transit hubs slash grid reliance by 70%--featuring heated seats, real-time updates, and USB ports. Winner of the 2025 Nordic Smart City Prize!

The Vuosaari Storage Hub, which pairs 50 MW solar arrays with 30 MW wind turbines. During a 2023 winter storm, it supplied 18 hours of uninterrupted power to 40,000 households--proving hybrid ...

EPV Energy's new solar park is set to become one of Finland's largest, featuring 123,000 solar panels. The site's pilot field includes a tracker section with 1,155 solar panels. A new substation ...

At its core, Hot Heart consists of four massive water reservoirs located offshore in the Baltic Sea. These reservoirs function as thermal energy storage units, or "giant batteries," storing ...

The aim of this study is to assess the potential of large-scale utilization of solar panels on the roofs of Helsinki, Finland. First, a literature review is conducted on the topics of solar power and spatial ...

Imagine a city where wind turbines and solar panels power 80% of homes even when the sun isn't shining or the wind isn't blowing. That's exactly what Helsinki's new energy storage initiative aims to ...

Helsinki s new outdoor solar power hub field

The current state and future of solar power in Finland will be discussed today at Solar Power Finland, the country"s largest solar energy seminar, held at Kaapelitehdas in Helsinki. The ...
