Who owns the power plant in the Gambia?

These facilities are operated by National Water and Electricity Company(NAWEC) and Karadeniz Power ship Koray Bey Company Limited - an Independent Power Producer (IPP). In 2018, the effective electric installed capacity in The Gambia was around 135 MW.

Does the Gambia have a hydro potential?

Hydro potentials are non-existing in the Gambian territory. The average annual solar insolation for The Gambia is 4.5-5.3 kWh/m²-day, which represents a high generating potential for the country, making it interesting for PV Power Plants, Solar Home Systems (SHS), solar heater for the domestic and hotel industry and Hybrid Diesel-PV Systems.

How does electricity work in the Gambia?

In 2018, the effective electric installed capacity in The Gambia was around 135 MW. About 73% of this installed capacity is operated by NAWEC while the remaining 27% is operated by an IPP (Karpowership). Currently, Electricity is transmitted from these stations for distribution via five radial 11 kV feeders and three 33 kV feeders.

Why is a solar power plant important in the Gambia?

H.E. Corrado Pampaloni, Ambassador of the European Union to The Gambia, stated that this solar power plant is particularly important for the Gambia as it is part of the 'Gambia Electricity Restoration and Modernization Project' and contributes to a swift transition towards solar power and clean energy supply across the country.

The proposed Gambia Electricity System Rehabilitation and Expansion Project (GESREP) is to be funded by the African Development Bank (AfDB) to contribute to the Government of The Gambia's ...

In May this year, the World Bank approved \$52.6 million in financing to support electricity and transmission infrastructure in The Gambia. The initiative will see the construction of 60km of ...

The Inauguration Ceremony, which was presided over by His Excellency Adama Barrow, the President of the Republic of The Gambia, celebrated the completion of a 23 MWp Photovoltaic ...
