How long has the PSC been working on an energy storage plan?

Efforts towards a finalized implementation plan have been ongoing since June 2024, when Governor Hochul first announced that the PSC had approved an Energy Storage Roadmap in furtherance of the state's goal to achieve six gigawatts ("GWs") of energy storage by 2030.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Why are energy storage resources important?

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy sources. Currently 23 states, plus the District of Columbia and Puerto Rico, have 100% clean energy goals in place.

What are the requirements for a new energy storage system?

or the NYISO. Projects must also meet the following requirements: The energy storage system must be a new, permanent, stationary system designed and installed by an eligible Participating Contractor. The storage system may be standalone, or intercon

The proposed Implementation Plan filed by NYSEDA and approved by the PSC with modifications will help facilitate the development of 3,000 MWs of new bulk energy storage resources ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

With global electricity demand rising by 3.2% annually (IEA 2023), homeowners increasingly seek reliable solutions to reduce grid dependency and lower energy bills. This article explores actionable ...
