How much does a home battery cost in New Zealand?

Battery prices are coming down, but the upfront cost is still significant. On average, home batteries in New Zealand range from \$800 to \$1,200 per kilowatt-hour (kWh) of storage, depending on the brand and installation requirements.

How much does storage cost in Auckland?

There is no "one-size-fits-all" price. The storage cost Auckland facilities charge depends on five key factors:

1. Unit Size (The Biggest Factor) Storage is priced by square metre. The larger the unit you need, the higher the monthly cost.

Why is battery storage important in New Zealand?

Battery storage, from household to utility-scale batteries and within electric vehicles, is a game changer in the energy transition. Solar penetration is still low in New Zealand but it is growing quickly and if we want to make the most of it we need to capture and store it to be used when the sun isn't shining and when demand is at its highest.

How much does a battery system cost?

Overall Costs: The average total price paid for a battery system is \$14,396, indicating that energy storage is still a significant investment for many. The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget.

After 2020, costs are forecast to decline further to the point where battery storage is expected to have positive returns at distribution, commercial and residential levels if all services can be monetised, and ...

Discover 2025 Auckland storage unit prices in one clear guide that compares sizes, locations, and security, and shares money-saving tips.
