Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to 3000km with a ...

By integrating cloud services, photovoltaics (PV), energy storage systems (ESS), and intelligent control, the solution supports grid stability while enabling fast infrastructure deployment.

Huawei has unveiled its latest advancements in commercial and industrial (C& I) energy and electric vehicle (EV) charging infrastructure. The C& I One-Fits-All Solution offers Lite, Pro,...

Huawei FusionCharge Solution impresses owners of electric passenger vehicles with the concept of '1 km range by 1-second charge' and high-quality and convenient charging experience.

Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW,...

Huawei DriveONE provides integrated electric drive powertrain solutions for new energy vehicles, combining efficient motors and intelligent control to improve EV performance.

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast ...

Huawei has filed a patent for a new type of solid-state electric vehicle (EV) battery that could significantly change the future of clean transportation. The technology promises a driving range ...

Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's typical electric...

Huawei's electric energy storage vehicle solution

Huawei's DriveONE power domain convergence solution was also introduced, aiming to integrate power generation, storage, and consumption for EVs. This holistic approach seeks to ...
