Delta's hybrid AC/DC power solution meets complex demands of hyperscale IDC users. Multiple sets of Delta 10kV medium-voltage DC power supplies at 1.8MW and 2.5MW are deployed as the core of ...

New architectures and AC-DC distribution configurations are increasing demand for data center rack and PSU power, necessitating more processing power. This article examines some ...

In this paper, we analyze a few examples of converters and topologies which will fit in the new architecture, as well as the technologies and components that enable them.

Hyperscale data centers that power the digital economy, big data, IoT and artificial intelligence (AI) now operate with >30 kW server racks, and highly sophisticated cooling management systems.

To understand where each technology fits into the present and future landscape of AI power delivery, we'll take a closer look at how Infineon's power-supply designs have evolved to address the ever ...

Hybrid Si/SiC/GaN PSUs (3-12 kW modules) are already appearing in reference designs from Infineon, Analog Devices, and others. Sustainability and reliability are emerging as key differentiators for these ...

To address this, data centers are exploring the integration of both high-efficiency AC and 400V DC rack power distribution by leveraging mSiC(TM) technology to optimize power conversion, ...

System plus System (aka 2N) topology utilizes two completely independent systems to feed the critical load. The design is based on the customer deploying IT equipment with redundant power supplies ...

Access the rPDU remotely via the network interface or serial connection to monitor power consumption and configure user-defined alert notifications to prevent downtime.

Hybrid Type of Communication Power Supply Rack for Data Centers

Evolving its EcoStruxure(TM) Data Center Solutions portfolio, Schneider Electric introduced a Prefabricated Modular EcoStruxure Pod Data Center solution that consolidates infrastructure for ...
