EticaAG is developing some of the first immersion-cooled BESS products specifically engineered for data centers, launching in 2026. The company already offers utility-level, industrial, ...

By submerging battery cells in a non-conductive coolant, this system ensures exceptional safety and precise temperature control, maximizing the performance and lifespan for energy storage. This ...

Immersive liquid cooling energy storage systems are one of the crucial technologies in the future energy storage field, with very promising prospects for wide-ranging applications.

Hanwha Aerospace and SK Enmove have partnered to revolutionize energy storage systems. Hanwha Aerospace, in collaboration with SK Enmove, has unveiled the world's first ...

Kortrong another new product, "10MWh immersion liquid cold energy storage system", has also become one of the star products in the exhibition. The system adopts the leading ...

Enter immersed energy storage battery systems - the tech world's answer to keeping power cells chill without breaking a sweat. By 2025, over 60% of new industrial energy projects in ...

During the event, two groundbreaking products were launched: the world's first direct cooling immersion energy storage system and a high-safety, large-capacity mobile energy storage ...

Immersion technology effectively addresses cooling challenges in high-performance computing environments for AI servers, reducing energy consumption, operational costs, and increasing ...

Innovative fully immersed fire suppression system isolates oxygen, reduces temperature, and delivers zero fire risk. Dielectric coolant fully envelops battery cells, preventing thermal runaway propagation.

Sermatec Energy leads the field of new energy storage. As early as the beginning of this month, it took the

Immersed energy storage products

lead in launching the 261 fully immersed liquid-cooled outdoor cabinet.
