The 100MW Solar PV Power Plant with a 40MW/120MWh Battery Energy Storage System in Rajnandgaon, Chhattisgarh, represents a milestone in renewable energy deployment.

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone BESS project.

Learn about Battery Energy Storage Systems (BESS) in India, their role in enhancing RE integration, and how they contribute to a more reliable and efficient power grid.

Here's a detailed look at the leading BESS companies in India, why they matter, what they offer, and how they contribute to the country's energy transition. 1. Exide Industries Ltd. - India's ...

In this blog, we explore the top 7 biggest battery energy storage projects in India in 2025, highlighting their capacities, technologies, and strategic importance in supporting grid stability and renewable ...

Energy Storage Systems (ESS) can be used for storing available energy from Renewable Energy and further can be used during peak hours of the day.

The BESS market in India is on the cusp of unprecedented growth, driven by the country's ambitious renewable energy goals and the critical need for grid stabilisation.

This state-of-the-art energy storage solution is designed to support India's clean energy transition and strengthen the reliability of country's power infrastructure.

India's first grid-scale battery storage in Chhattisgarh enables cleaner energy, cuts emissions, and sparks

India small energy storage power station

massive investment in renewable power solutions.
