In 2023, the City of Lima partnered with D3 Energy, LLC for the design and construction of floating solar panels that will be located on the surface of Twin Lakes Reservoir, next to the City of Lima's Water ...

When the Lima Power Plant recently won the bid for a major energy storage project, it wasn't just another corporate press release. This move signals a tectonic shift in how utilities are ...

At the Twin Lakes Reservoir next to Lima's water treatment plant, construction crews are now in motion. Work toward building the city's \$5 million floating solar array is officially underway, ...

In 2023, the City of Lima partnered with D3 Energy, LLC for the design and construction of floating solar panels that will be located on the surface of Twin Lakes Reservoir, next to the City of ...

What Is Floating Solar And How Does It Work? The City of Lima recently took the first step towards building the state's largest floating solar array. Haven't heard of floating solar before? That's okay! ...

LIMA -- The city of Lima is on its way to becoming the home of the largest floating solar array in the state, thanks to legislation passed Monday by Lima City Council.

Lima, Ohio, has begun construction on a \$5 million floating solar array at Twin Lakes Reservoir, the largest of its kind in the state, with plans to complete the project by mid-2026.

Well, here's the problem - solar panels don't work at night, and wind turbines stand still during calm days. The Lima region's renewable plants currently waste enough energy to power 150,000 homes ...

The floating solar system will deliver 2 megawatts of capacity and include approximately 3,444 floating panels. Over its lifetime, the project is projected to save the City nearly \$10 million in electricity ...

The array, designed by Florida-based D3Energy LLC, is expected to generate up to 2 megawatts of energy,

Lima solar power plant system

enough to power the water treatment plant, according to Lima Utilities Director ...
