Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security.

Malta is taking a significant step forward in its clean energy transition, receiving 16 offers for the development of the country's first large-scale utility battery energy storage systems (BESS). ...

This pioneering project, the first of its kind in Malta, will not only provide essential electricity storage but also play a crucial role in responding swiftly to balance the grid during periods ...

Malta is Long-Duration Energy Storage Malta's grid-scale pumped heat energy storage system (PHES) is a low-cost, long-duration solution which will enable the global energy transition

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy.

The government has received 16 offers for the development of Malta's first large-scale utility battery energy storage systems, Minister for the Environment, Energy and Public Cleanliness ...

Interconnect Malta, a company within the Ministry for the Environment, Energy and Enterprise, will implement this project on behalf of the Government of Malta, in collaboration with Enemalta plc and ...

The system stores excess renewable energy as thermal mass - sort of like a giant thermos for electrons. During the 2023 Texas grid emergency, a Malta prototype provided 72 hours of continuous power ...

Battery energy storage systems allow power to be stored and then discharged. This is a sample photo provided by Interconnect Malta. A project to build two massive battery storage systems...
