The CPUC modified General Order 167, which currently provides a method to implement and enforce maintenance and operation standards for electric generating facilities, in order to add ...

This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage systems in the United States.

The American Clean Power Association is pushing for greater safety standardization in the energy storage industry, guided by the National Fire Protection Association, and their under ...

The 2026 edition of NFPA 855, the Standard for the Installation of Stationary Energy Storage Systems, is now live. Released by the National Fire Protection Association (NFPA), it ...

The codes and standards landscape started to change after a series of 23 fires, mostly occurring in the pe-riod of June 2018 to January 2019, at South Korean energy storage facilities.

During the 14th& nbsp;Five-Year Plan period, China"s energy storage technology mix witnessed noticeable changes where pumped hydro storage accounted for less than 40% for the first ...

Concurrently, CPUC staff is investigating the recent fire at the Vistra battery energy storage facility. The proposal modifies General Order 167, which currently provides a method to implement and enforce ...

While solar energy may be the leading renewable energy source, storage challenges have limited its adoption by utilities. Thanks to innovations in thermal energy storage in MWh quantities, solar ...

With the 2026 edition of NFPA 855 expected to be finalized and published in 2025, the energy storage industry is already incorporating key enhanced requirements and is ready to work ...

New energy storage standards are implemented

The energy storage industry actively promotes adopting and enforcing the latest national fire safety standards. CESA, together with our partners at American Clean Power, recommend two actions the ...
