How much does a small outdoor cabinet cost?

Small outdoor cabinets are often the most affordable option for housing telecommunication equipment. These enclosures are compact and designed to protect essential components in outdoor environments. Prices for small outdoor cabinets typically range from \$500 to \$2,000, depending on the materials and features.

How much does a large telecommunication cabinet cost?

Large indoor cabinets are designed for extensive telecommunication systems in controlled environments like data centers. These telecom racks provide ample space for organizing equipment and often include advanced cable management and cooling systems. Prices for large indoor cabinets range from \$2,000 to \$10,000 or more.

What are outdoor data cabinets & server rack cabinets used for?

Our outdoor data cabinets and outdoor server rack cabinets are perfect for housing IT, telecom, security, and networking equipment, including 5G and Edge computing applications. We offer both single and double door options, with a bespoke manufacturing and paint service available.

Can a base station be built inside OUTD cabinets?

A whole base station can be built inside our OutD cabinets. Cabinets Our OutD series includes multiple wall structure alternatives for protecting telecom equipment in the best possible way, from a single-layer wall construction with light and cost-effective design to a multilayer construction designed for more demanding conditions.

Our cabinets are built to withstand harsh weather conditions and provide excellent protection for power management systems, telecom base stations, energy storage battery systems, and radio equipment.
