Is there a Bess project in West Ottawa?

Yes, there are two transmission scale BESS projects proposed in rural west Ottawa. One in West Carleton-March (Ward 5) and the other is in Rideau-Jock (Ward 21). Are there land use impacts associated with BESS?

Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

What is a Bess energy storage facility?

When necessary, the BESS will discharge electrochemical energy onto the grid to provide power to a location that is using more than the previously available amount. The location of the Marchurst/South March energy storage facility or BESS in the rural part of west-end Ottawa between the villages of Dunrobin and Carp. [Image © Evolugen]

What is a Bess facility?

BESS facilities are a specific type of energy storage system that store energy using batteries. Considerations for zoning must consider their intended use, preferred location and size.

The two BESS projects represent a potential investment of approximately \$1 billion in clean energy technology in the Ottawa-area, helping improve grid reliability amid the growing ...

All development activities have been currently suspended for the Ottawa BESS 2 Project as it is not moving forward for the IESO's LT1 RFP.

This Utility Battery Energy Storage System (BESS) Commissioning Plan outlines the procedures for commissioning the system's primary components, including the 230kV Gen-Tie Line, ...

After speaking to Ottawa Fire Chief Paul Hutt, he was also able to share some answers to some frequently

Ottawa communications bess power station production

asked questions in regards to the responsibilities of Ottawa Fire Services when it ...

Essentially, a BESS is a massive collective battery -- in this case a lithium ion battery -- to store electricity and distribute it as needed. The proposed property totals about 81 hectares of land.

BESS have been identified as an important type of energy infrastructure to address the issue of peak hour shortages, as well as providing access to energy closer to home. BESS can also support ...

Consult with Hydro Ottawa and learn their perspectives on how much investment in the Ottawa-region transmission and distribution is needed and where it is coming from

“Ontario needs to generate more power, and our government has the plan to build out affordable, reliable and clean energy for our families and future generations.” - Hon. Stephen Lecce, Minister of ...

A proposed \$650-million BESS energy station was recently approved for rural west-end Ottawa by city council but has generated great controversy among residents of West Carleton-March ...
