Are hybrid PPAs a viable solution to co-location?

PPAs |The co-location of renewable generation and energy storage demands new contractual arrangements to make such projects commercially viable. Jack Rankin, Miguel Valderrama and Brian Knowles of Pexapark explore how hybrid PPAs are becoming a favoured solution for structuring deals that capture the full value of both assets

What is a PPA for new energy storage resources?

Some PPAs for new energy storage resources have been structured as capacity-only contracts in which the developer is responsible for the sale of energy and all costs associated therewith--including the costs of the required energy procured from the utility.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

Are solar manufacturers circumventing antidumping and countervailing duty orders?

The solar market was further constrained by an ongoing petition before the US Department of Commerce alleging that certain solar manufacturers in Southeast Asia were circumventing antidumping and countervailing duty (AD/CVD) orders on solar cells and modules from China.

If you're an EPC contractor, project developer, or a caffeine-dependent engineer scrolling through yet another article on energy storage photovoltaic bidding documents, welcome!

Decide whether to include solar + storage projects in a procurement based on storage benefits for addressing energy cost savings and/or resilience use cases at specific sites.

15kW / 35kWh Hybrid Solar System Integrated Energy Storage Cabinet Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an ...

Members of SEIA have access to a version of the C& I PPA Agreement in editable Microsoft Word format.

Click here to access, or download the PDF at the link above.

With a hybrid PPA, it's possible to have a physical asset to manage the different types of PPA structures, practically turning storage into a physical hedge to complement the financial hedge of the renewable ...

There are three key types of procurement contracts--power purchase agreements (PPAs) or energy storage services agreements; engineering, procurement, and construction (EPC) ...

Buyer shall pay Seller the Renewable Rate for each MWh of Generating Facility Energy plus the amount of Deemed Delivered Energy (as adjusted by the Curtailment Cap), for the relevant month, up to one ...

The solar services provider purchases the solar panels for the project from a PV manufacturer, who provides warranties for system equipment. The installer will design the system, ...

With the rapid advancements in clean energy technologies and evolving market dynamics, embracing solar photovoltaic (PV) and energy storage solutions will be key to unlocking long-term value and ...

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput.
