What are IBM 42U & 47U 1200 mm deep rack?

IBM 42U and 47U 1200 mm Deep Rack offerings are industry-standard 19-inch server cabinets that are designed for high availability IBM System x and BladeCenter environments. They are optimized to help maximize floor space, expedite installation, simplify cable management, and increase accessibility for improved serviceability.

What is a Lenovo 42U 1200 mm deep rack?

Lenovo 42U 1200 mm Deep Rack offerings are industry-standard 19-inch server cabinets that are designed for high availability server environments. They are optimized to help maximize floor space, expedite installation, simplify cable management, and increase accessibility for improved serviceability.

What size rack is available for a network cabinet?

The 800 mm wide rack is also available for a network cabinet. Our cabinets are the EIA standard 19" server rack. The sizes are available in 24U, 42U and 48U to get the most height out of your data center space. All of these rack options come standard with 2 vertical cable management bars that are the same height of the rack.

What is a dynamic rack?

Dynamic Racks are designed to affordably, safely, and securely handle shipping fully loaded configurations up to 950 kg (2,100 lbs), which can help to increase your efficiency by reducing the time and cost that is associated with typical server deployments.

This product is available at a lower price from other sellers. Pay over time with Affirm. See if you qualify at checkout.
