Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Does a foreign entity retain documents pertaining to an export shipment?

For items in this section,a foreign entity as the USPPI and the FPPI shall retain documentspertaining to the export shipment as a party to the export transaction; however,the EEI shall not be disclosed to a foreign person or foreign government either in whole or in part.

Is shipping weight required for exports?

The shipping weight is requiredfor exports by air,vessel,rail, and truck, and required for exports of household goods transported by all methods. For exports (except household goods) by mail, fixed transport (pipeline), or other valid methods,the shipping weight is not required and shall be reported as zero.

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage,such as a 10-20% universal tariff,tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.
