San Marino is a small country and is known as one of the world's oldest republics. Despite being small, it has joined in what is known as the solar revolution that is taking over the global energy sector.

In San Marino, most of the solar power equipment for solar installations is from global or online suppliers and distributors. There is still a lack of local manufacturers and companies making solar equipment.

This case study of San Marino illustrates that a successful solar manufacturing project begins long before any equipment is ordered. It starts with a meticulous, on-the-ground
