How much does a solar PPA cost?

The average preincentives cost for a home solar system in the U.S. in 2024 is \$29,926, according to EnergySage, a solar and home energy product comparison marketplace. Solar PPAs can let you enjoy the benefits of solar and savings on day one without that large upfront cost. Electric bill savings.

Is a PPA better than a solar lease?

"PPAs tend to be better than solar leases in this regard because the customer pays a price per kWh and thus won't need to pay if the system isn't working properly," said Roger Horowitz, director of Go Solar programs at Solar United Neighbors, a national nonprofit that helps people switch to solar.

How long does a solar PPA contract last?

But some PPA companies estimate monthly use, according to EnergySage, so ask whether your monthly charges are based on actual energy output. Contract term length. Solar PPA contracts can run for 10-25 years and may come with early termination fees. Think about your long-term plans for your home when considering the length of your PPA contract.

Do solar PPAs make solar more accessible?

With their relative ease of signing up and more immediate savings, solar PPAs can make solar more accessible. Chance Allred, chief experience officer at Sunrun, the largest U.S. residential solar installer, says that more of the company's customers nationwide are now choosing a PPA over paying cash or getting a loan.
