The BFH-CSEM Energy Storage Research Center ESReC is a joint research and development center embracing several research groups within the Department of Engineering and Information ...

This article targets businesses and homeowners seeking reliable PV storage systems, as well as industry professionals exploring Bern's renewable energy ecosystem.

The lighthouse project is unique in the world: an ice energy storage tank combined with a Hybrid Solar Panels (PV-T) on the roof will cover the entire demand for heating energy, hot water, and electricity.

A 50MW solar plant integrated Bern Energy Storage units to reduce curtailment losses by 18%. The system provided 6 hours of backup during grid instability, saving \$120,000 monthly.

Discover how Bern's innovative energy storage initiatives are addressing grid stability challenges while creating opportunities for international collaboration in renewable energy solutions.

One of the main challenges of the energy transition is to develop systems capable of storing excess energy and returning it when it is needed. Pumped-storage power stations are the ...

Bern, Switzerland's capital, is accelerating its transition to renewable energy with strategic investments in energy storage systems. This article explores the current status of energy storage power stations ...

Enter the Berne Electrochemical Energy Storage Project - a game-changer in storing renewable energy at scale. As global energy storage hits a whopping \$33 billion market value [1], ...

The solar cells are installed so that their blue-shimmering rear side faces the sun - in contrast to the usual black front side. The result: a facade with characteristic colour variation and high energy ...
