-----

The Rural Electrification Agency (REA) commissions a 100kWp solar mini-grid in Damau Village, Kaduna, providing clean electricity and potable water to over 2,500 residents while boosting ...

After decades of having to retire at dusk or rely on noisy, smelly and expensive diesel generators, local communities are able to take the energy supply into their own hands, thanks to the ...

The Federal Government, through the Rural Electrification Agency, REA, has completed and commissioned a 100-kilowatt-peak solar mini-grid in Damau, a

The Rural Electrification Agency (REA) has successfully completed and commissioned a 100 kWp solar mini-grid in Damau, a rural community in Kubau Local Government Area of Kaduna State, ...

Discover how photovoltaic energy storage systems are transforming rural Nigeria's energy landscape while addressing electricity access challenges sustainably.

Amid the global energy transition, many regions in Africa still face challenges from insufficient power supply and unstable power grids. Recently, SCU successfully provided two ...

Nigeria, Africa's most populous nation, is embracing solar energy like never before. The rise of decentralized, off-grid solar projects is lighting up homes, powering schools, and turning small ...

The project is a critical solution to provide efficient and renewable solar energy to rural areas and reduce the distributed natural gas generation. The project is expected to avoid approximately 50,000 tonnes ...

Farmers utilize solar-powered irrigation and cold storage to reduce post-harvest losses and boost income. Women can cook safely with electric stoves, reducing hours spent collecting ...
