I have run out of viable space (that Mrs will let me use) to house my inverter and battery for when my solar arrives next month (GivEnergy). So have been looking at alternatives. Originally ...

One of the biggest mistakes in solar system setups is selecting an incompatible inverter type, which can result in inefficiency and performance issues. For instance, installing a hybrid ...

Would I be fine hooking them up indoor like a power station until it's built? I've got two trophy batteries, inverter and all the fixings. it's probably going to be a month before we can build everything outside.

I mean, it's cheap enough, and its energy use only amounts to an extra solar panel. I have plenty of room on the ground to add pretty much as many panels as I wish.

This guide provides step-by-step instructions on how to install your R-BOX-OC outdoor solar battery cabinet, including site selection, assembly, wiring, and system testing.

Charging/discharging is from Solar and early mornings and late afternoons mostly. From this box there will be 3/4" rubber flex conduit to an inverter no more than 3-5ft wire run which is Nema 3R rated.

If a metal back sheet is used under conditions of direct sunlight, it is recommended to leave 30 cm of clearance between the sheet and the inverter. A clearance of under 30 cm may cause the inverter to ...
