After a long process of planning, procurement and complicated logistics, we have finally installed a sophisticated system to capture the sun's energy and provide power to Vamizi's six villas ...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale ...

Mozambique has an abundant and unexploited solar resource which could be harnessed for utility scale as well as residential PV for both on/off grid electrification. The following map shows the global ...

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

Mozambique is planning to build a floating solar power farm in the centre of the country, as part of a series of renewable energy projects over the next six years.

In summary, the new solar plants in Cabo Delgado and Nampula are more than just power generation facilities; they are symbols of Mozambique's journey towards a sustainable, resilient, and ...

Solar power generation system on an island in mozambique

A community of farmers found new hope in the construction of the Mocuba solar plant that is providing consistent, clean, and affordable energy to homes and small businesses in Zambezia region, ...
