-----

Gothenburg, 27 February 2025 - RES, the world's largest independent renewable energy company, has successfully completed the sale of a fully ready-to-build 70MW/160MWh battery energy storage ...

Three Swedish energy system scenarios for 2045 were simulated at national level. TES and hydrogen storage with sector coupling were included to evaluate wind integration and total fuel ...

In 2022, Swedish energy giant Vattenfall unveiled a 22 MW battery storage system in Uppsala. This isn't your average Tesla Powerwall--it's designed to balance grid fluctuations ...

As the world races toward decarbonization, Sweden's new energy storage technology is turning heads globally, blending Nordic pragmatism with breakthroughs that even Elon Musk might ...

Named Isbillen Power Reserve, the 1-hour duration Battery Energy Storage System project will be the largest in Sweden and the largest in the Nordics by megawatt (MW) power.

The test project for storing fossil-free hydrogen in large rock caverns has been technically proven to work

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone investment ...

HYBRIT's pilot project for hydrogen gas storage has now been completed and reported to the Swedish Energy Agency. The results show that it is technically possible to store fossil-free ...

The project has built a 100 cubic meter hydrogen storage in a rock room in Luleå. The completed tests show that the technology works to support a large-scale hydrogen user, and that ...
