Syria's power crisis is unlikely to be resolved through grid repair alone. For millions of Syrians, renewable energy combined with battery storage offers a practical, scalable, and affordable way to ...

With Blackridge Research's Global Project Tracking (GPT) platform, you can identify the right opportunities and grow your pipeline while saving precious time and money doing it. Free! No Strings ...

The project features a floor-standing 15.36kWh lithium battery cabinet integrated with a SAKO hybrid inverter, designed to provide both backup power and solar self-consumption for ...

One RV owner in Tartus swears by his battery's "Bedouin mode" - automatically reduces power to essential systems during sandstorms. Because sometimes, you really don't need that ...

At Extron, we take pride in being one of the most trusted battery suppliers in Syria, providing advanced energy storage systems tailored for residential, commercial, and industrial use. Our dedication to ...

Our battery cabinets are designed with advanced features to meet industry standards. They are equipped with ventilation systems to prevent overheating and are made ...

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply.

Robust electrical systems and fire-resistant materials for high-temperature and high-pressure tolerance. Our outdoor cabinet is IP66 constructed in an environmentally controlled liquid cooled cabinet ...

Unlike traditional lead-acid batteries requiring frequent maintenance, these maintenance-free units can withstand Syria's extreme temperatures (from -20°C to 60°C) while delivering 5,000+ charge cycles.

Syrian oil platform uses IP66 battery cabinet for fast charging

Enhance energy efficiency in oil and gas facilities with BX Energy Systems" advanced Battery Energy Storage Systems (BESS). Our solutions provide reliable power, reduce costs, and support ...
